ASSIGNMENT-1

TITLE: THREE MAIN LAYERS OF SOFTWARE ARCHITECURE

INTRODUCTION :-

Software architecture divides a software system into different layers to improve organization, performance, and maintainability.

❖ THE FIVE LAYERS OF SOFTWARE ARCHITECTURE ARE:

- PRESENTATION LAYER
- APPLICATION LAYER
- BUSINESS LAYER
- PERSISTENCE LAYER
- DATABASE LAYER

❖ THE THREE MAIN LAYERS WITH DESCRIPTION ARE:

1. PRESENTATION LAYER:

This layer provides the user interface and manages all interactions between the user and the application.

2. BUSINESS LAYER:

This layer contains the core business logic and processes the application's rules and operations.

3. DATABASE LAYER:

This layer stores, organizes, and retrieves data required by the application.

CONCLUSION:

The Presentation, Business, and Database layers work together to ensure the software is efficient, well-structured, and easy to maintain.
