ASSIGNMENT-2

Title: Product Companies and Service Companies

Introduction:-

In the business world, companies are mainly divided into product companies and service companies. Product companies develop and sell products, while service companies provide professional services to customers and other businesses. Both types of companies contribute significantly to technological advancement, customer satisfaction, and economic development.

PRODUCT COMPANIES

1. Microsoft

- **TYPE**: **Product Company**

- ***Example of Work***: *Develops software products such as Windows operating system and Microsoft Office.*

2. Apple

- **TYPE**: **Product Company**

- **Example of Work**: Designs and manufactures iPhones, iPads, and Mac computers.

3. Dell Technologies

- **Type**: **Product Company**

- **Example of Work**: Manufactures laptops, desktops, servers, and computer accessories.

SERVICE COMPANIES

1. Tata Consultancy Services (TCS)

- **Type**: **Service Company**

- **Example of Work:** Provides IT consulting, software development, and business solutions.

2. Infosys

- **Type**: **Service Company**

- **Example of Work**: Offers application development, cloud computing, and digital transformation services.

3. Accenture

- **TYPE:** ***Service Company***

- ***Example of Work****: Provides technology consulting, business strategy, and IT outsourcing services.*

Conclusion

Product companies focus on creating and selling products, while service companies focus on delivering expertise and solutions to customers. Both types of companies are important in the IT industry and offer excellent career opportunities.
